This is a brief outline on procedures for the skywatches. This memo will be updated periodically and will be always available on the madar site if you need it.

Before you dial into the skynet Intercom, turn on all your equipment and set to SAVE. The Night Vision is different, you simply press record. Team 1 has a strobe they need to turn on and place behind them at a reasonable distance.

If you have a headset for your cell phone, attach that so you are hands free.

Dial into the skynet intercom system
1-970-591-7001 and wait for the prompt, then punch in
80517

With the current plan you will not have to wonder what weekend, what night, what time. Unless we change it we will be open every Sunday evening at 8:00 PM, IF you are available and want to participate and IF the weather permits. Don't worry about when you can participate, just clock in when you feel like it.

The rest will be easy.

Fran
